Education

National Institute of Technology (NIT), Andhra Pradesh

Aug 2020 – May 2024

- B.Tech. in Computer Science Engineering

Technologies

Programming Languages: Python (Proficient in DSA), Java, TypeScript

Web Technologies: HTML, CSS, JavaScript, PHP, React.js, Node.js, Express.js

Frameworks / Technologies: Flask, Django, Spring Boot, Selenium, Laravel, UiPath, JIRA, Git, Redux, MUI

Databases & Cloud: MySQL, MongoDB, AWS Cloud

Other Skills: GitHub, XAMPP, Google Docs, Photoshop, MS Office, Gmail OAuth 2.0, Microsoft OAuth 2.0

Work Experience

Software Intern, Codetru, Hyderabad

Apr 2025 – Present

- Worked on front-end development and production support across two enterprise platforms using React, TypeScript, Redux, and MUI.
- Contributed to the development team for Surf (US Payroll) and handled production support for Japfu (Workforce Management), ensuring stability and timely issue resolution.
- Implemented responsive UI components and integrated APIs for seamless user interactions and data handling.
- Collaborated in an Agile environment, participating in code reviews, debugging, and performance optimization.

Full Stack Developer Intern, Adiquity Technologies

May 2024 – Nov 2024

- Developed and optimized backend APIs in Flask and Laravel, reducing response time by 25%.
- Conducted automation and regression testing, identifying critical bugs and improving software reliability.
- Collaborated in Agile sprints and code reviews, ensuring feature scalability and security.

Projects

Surf: US Payroll and Compliance Platform (*Development Role*)

[Link](#)

- Built key UI components for a payroll platform for startups using React, TypeScript, Redux, and MUI, focusing on payroll execution, employee data, reimbursements, and deductions.
- Implemented full-stack OAuth 2.0 authentication with Python and TypeScript for Google and Microsoft login, managing token generation, storage, and refresh for secure access.
- Enhanced payroll accuracy through dynamic UI components and API integrations for seamless expenses, deduction processing, paystubs and transactions.

Japfu: Workforce Solutions Platform (*Production Support Role*)

[Link](#)

- Developed a workforce management platform with modules for timesheet management, notifications, employee onboarding/offboarding, bills, and client/employee profiles using React and MUI.
- Designed intuitive UI components and integrated APIs to streamline administrative workflows, achieving reduced task processing time.
- Ensured consistent user experience across modules with dynamic forms and efficient debugging, improving platform accessibility and performance.

Self-Aware Fairness Influence Maximization

[Link](#)

- Developed adversarial graph embeddings for fair influence maximization, ensuring equitable influence spread.
- Applied CELF++ and K-Means for seed node selection, achieving a 15% improvement in fairness metrics.

Certifications

- **Introduction to Machine Learning**, NPTEL, IIT Madras (2022)
- **Data Science for Engineers**, NPTEL, IIT Madras (2023)
- **Applied Accelerated Artificial Intelligence**, NPTEL, IIT Palakkad (2023)
- **The Complete Data Structures and Algorithms Course in Python**, Udemy
- **Responsive Web Design**, freeCodeCamp
